Overview

This guide walks IT support staff through installing and activating the **LanguageLine InSight** app on a store iPad. Once activated, the device gives store associates ondemand access to live video and audio interpreters in 240+ languages.

WHO PERFORMS THIS TASK

IT Support - Tier I

WHEN TO USE THIS GUIDE

- New Store
- Device Installation
- Device Replacement

DEVICES AFFECTED

Language / Translation iPads

OUTCOME

LanguageLine activated and ready for store use.

Procedure

Platform : iPad (OS)

5-7 min.

Prerequisites

Have the following before performing installation:

- Latest version of iOS is installed
- IT Apple account is signed in

Use IT's Apple ID

Store iPads are managed under a shared Apple ID. You do not need individual credentials to install the app.

Installing the app

- 1 Unlock the iPad.**
Enter PIN `XXXX` on the lock screen.
- 2 Open the App Store**
Tap the **App Store** icon on the home screen. If the icon is not visible, swipe right on the home screen to open App Library and search for "App Store".
- 3 Search for **LanguageLine Insight****
Tap the search bar at the bottom of the App Store and type **LanguageLine InSight** . The app publisher is *LanguageLine Solutions*, confirm that it is correct before doing anything.
- 4 Tap **Get** to begin the download**
Wait for the download and installation to complete. The button will change to **Open** when the app is installed.
- 5 Return to home screen**
Press the Home button or swipe up from the bottom of the screen. Locate the **LanguageLine InSight** icon on the home screen or in App Library.

Activating the device

- 1 Open the LanguageLine InSight app**
The app opens to an activation screen with two text fields and a greyed-out Activate Device button.
- 2 Enter the authentication code.**
In the first field, enter `XXXXXXXXXX` exactly as shown. The code is case-sensitive.
- 3 Enter the device name.**
In the second field, enter the store number using the format `0[Store#]` For example, Store 29 → enter `029`
Use leading zero as shown.
- 4 Tap Activate Device.**
The button becomes active once both fields are filled. Tap activate, the app will prompt the store to select a language. The device is ready to use.

Verify Setup

1 Confirm the language selection screen appears.

Immediately after activation, the app should display a list of available languages. This confirms the device has connected to LanguageLine.

2 Select a language and initiate a test call.

Tap any language from the language list, then tap "Video" to request an interpreter. End the call immediately after confirming, do not wait for an interpreter.

Setup complete

If the language list appeared and the test call initiated, the device is configured correctly. Inform the store that the iPad is ready for interpreter sessions.

Troubleshooting

"Activate Device" button remains greyed out

Both fields must be filled before the button activates. Verify that the authentication code field and the device name field each contain an entry. Tap each field to confirm the keyboard appears and the text was saved.

App is not visible in the App Store search results

Ensure the iPad is connected to Wi-Fi. If the connection is confirmed, sign out of the App Store and sign back in, then repeat the search for LanguageLine InSight.

Activation fails with an error message

Verify the authentication code is entered exactly as "XXXXXXXXXX" with no spaces. If the error persists, contact your IT or System Administrator, the code may have changed.
